Oven container suitable for, for example, potato gratin.

Item nr.	1660
Size	162,5 x 88,5 x 60 mm
Weight	263 g

Using our Universal pans you can make a perfect, creamy and deliciously golden brown potato gratin or lasagna. Your oven omelet gets that perfect consistency otherwise only experienced at really good restaurants. This is because of our unique surface, which gives a much better distribution of heat than other oven containers on the market. When the time comes to do the dishes you just use lukewarm water and a regular scrubbing brush to get your container sparkling clean. This is one of the major advantages of our surface.

Of course you can use this container for frying as well.
