Container suitable for, for example, 8-10 90 gram hamburgers.

Item nr.	2320
Size	325 x 354 x 20 mm
Weight	680 g

Our Universal pans combine culinary cooking skills with efficiency and energy savings. The secret lies in iPinium's unparalleled and patented aluminium alloy. The containers' optimal capacity of absorbing, retaining and transmitting heat as good as halve cooking time compared to regular containers. Meanwhile the container helps preserve the fluid in the raw produce. The food, quite simply, taste better. Dishes also look tastier since the iPinium containers give a beautiful cooking surface.

There is no need to use any fat while cooking. The produce will not burn on our unique surface. This of course means that you can offer guests a healthier, more nutritious meal.

After eating, when it is time to do the dishes, there is another surprise. All you need to get the container sparkling clean is lukewarm water and a plain scrubbing brush. If you're using a dishwasher, our tests show that you can halve washing time with an iPinium container compared to a regular professional container.

This is what we mean with a whole new way of cooking!
