

SelfCookingCenter®/CombiMaster® Plus

# Marine version

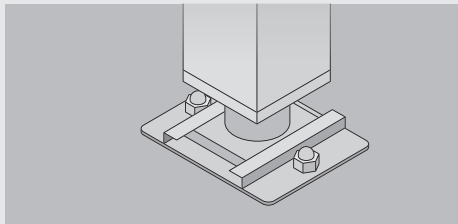

# Cook safely when sailing.

Even on the roughest seas.

The marine version is suitable both for passenger ships and for hard naval use. Here, the safety of operators and assuring all the important unit functions, even in rough seas, are the key factors. The RATIONAL marine version is approved by the internationally recognised Germanischer Lloyd and meets the strictest hygiene requirements according to USPHS.

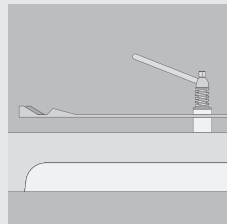

The marine version is available as an option for all SelfCookingCenter® and CombiMaster® Plus units and the Combi-Duo in electric models.

## Equipment

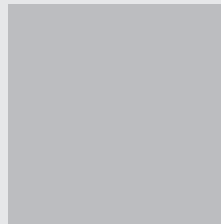

**Anti-tipping protection**  
(XS model 6 2/3 and models 61/101/62/102)  
Special floor attachments prevent the base unit from slipping or tipping. The unit is securely mounted on the oven stand with a plate.

**Anti-tilting protection**  
(model 201/202)  
The stainless steel feet can be welded directly to the ship floor or with special mounting plates to prevent slipping and tilting. Wall mounting is also provided for with 2 retaining brackets.

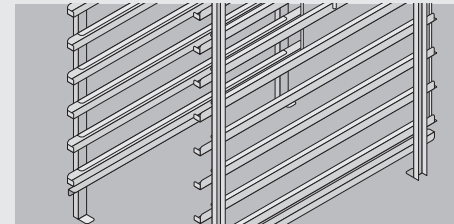

**Door stopper holds**  
Flexibly adjustable door stopper holds the cooking cabinet door open even on rough seas. For tabletop units - protective guards for the left and right side panels.

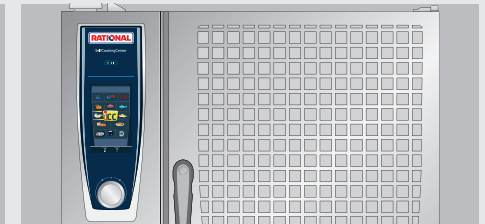

**Special marine oven stands for all table-top units**

- > Stainless steel feet for fixing to the floor - welded or screwed
- > Support rails with back splash to secure Gastronorm accessories
- > Special stainless steel brackets to fix the unit to the oven stand

**Hinging rack with catch for Gastronorm accessories**  
Special upstand on the hinging rack prevents Gastronorm accessories from slipping out. The hinging racks are also compliant with USPHS requirements. This guarantees secure and hygienic use of the units at sea.

**Setup flush with the wall (Model 201/202)**  
An optional installation frame allows standalone units to be installed flush with the wall.

**Protective door grille (optional on request)**  
The external glass on the cooking cabinet doors is protected against damage by a door grille. Visibility into the cooking cabinet is ensured even when the door is closed.
