

Scotsman Ice Systems is the **world leader** in the production and sale of commercial and domestic ice makers, alongside with ice storage and transport systems. Founded in 1950, the Company has over half a century of experience in design and production of ice makers, now synonymous with innovation and reliability.

The Scotsman catalogue is the most complete on the market, with machines of all sizes, that can produce from 10 pounds of ice up to a maximum of 5 tons in 24 hours. With more than **one million Scotsman units installed around the world**, and a **distribution presence in over 100 countries** in the America's, in Asia Pacific and in Europe / Middle East / Africa, the Company is strong of **four factories**, one in the United States, two in Italy and one in China. Fully owned distribution companies are located in Singapore, Dubai (with bonded warehouse), Barcelona, Spain, and in Johannesburg, S.Africa. A "branch office" was recently opened in India, and groundwork has started in Brazil.

This is the result of years of activity lead by the belief that the commercial activity needs to be backed by Technical support, as Customer-service is what eventually makes the difference in the market. Scotsman Ice Systems is a "Truly Global" member of the Ali Group.

The leading global "one-stop-shop" for all your ice needs
