EXCELLENT SOLUTIONS

Oxin was founded in 2004 as the Marine division of the Artserf group, an established brand in the catering and self-service facilities market.

Since the beginning, our mission has been the design, production and commissioning of catering solutions for cruise ships. It is an ambitious challenge. In fact, more so than ever, the exacting certification standards of the marine sector have propelled the stainless steel processing operations towards higher quality and specialisation.

Oxin integrates the dynamism of its design ideas with the manufacturing excellence and high-quality craftsmanship. The resulting combination is a fusion of prodigious engineering capabilities and painstaking attention to detail.

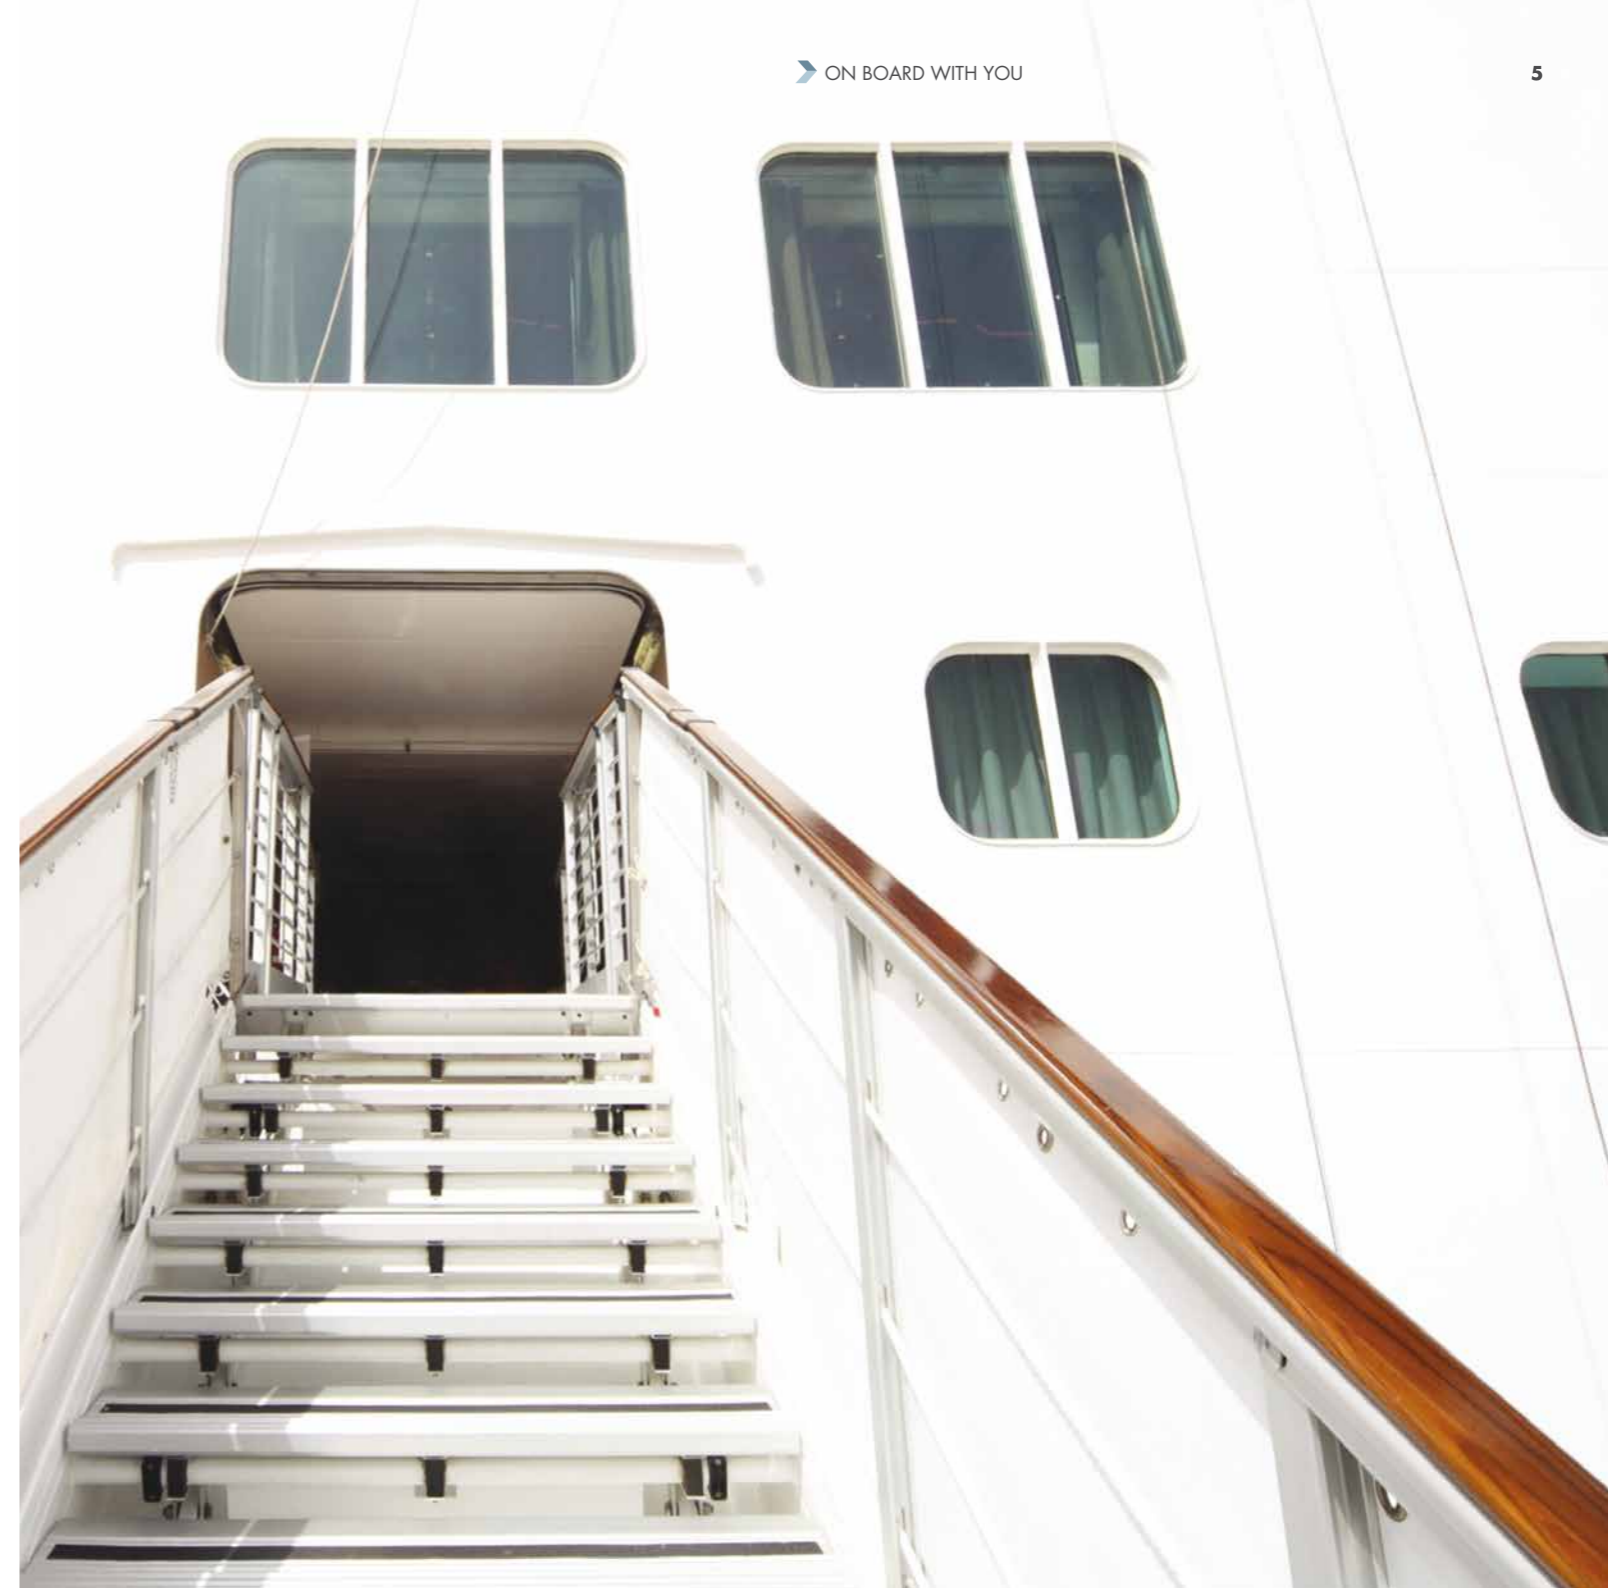

Over the years, by following this distinctive approach, Oxin has become a reference brand in the marine catering sector, being involved in projects of every dimension, from new vessels to refits.

In 2016, Oxin benefitted from new strategic investments and branched off from the Artserf group to further focus on its goals and development in the marine sector.

Thanks to a thirty-year long know-how in processing stainless steel and a decade of direct involvement in the marine sector, Oxin has become the ideal partner for the clients pursuing a thorough, integrated and flexible project management.

ON BOARD WITH YOU

Oxin cooperates closely with its clients to manage every stage of each new project: from the initial briefing to the assembly stage, from manufacture to maintenance. We are reliable, flexible and can adapt at any stage while staying committed to the initial objective, even in case of last-minute adjustments.

FROM BRIEFING TO MAINTENANCE, FROM CRUISE TO REFIT

Oxin support is dedicated to all areas of the shipbuilding industry.

OXIN CRUISE

Our commitment in this sector is highly likely to grow in the future through penetration of new international markets and by serving the cruise industry in a more targeted fashion.

OXIN MEGAYACHT

This division is dedicated to special projects in the luxury yachts sector, a market where the radical customisation of projects and products, combined with the finishes of utmost prestige, are perfectly suited to both Oxin's unique skills and ample experience.

OXIN REFIT

Thanks to its dynamism and design flexibility, Oxin can offer every bit of the engineering know-how and management skills necessary for refitting operations.

YOUR RECIPES. OUR RECIPE

In order to achieve the maximum savings in terms of time and waste reduction, marine catering applications require responsive management and tight control of work operations. As a result, we can guarantee both the excellence and the durability of our products.

We offer fast response rates, timely problem solving and are always open to the flow of feedback from all the partners, from corporate chefs to hotel managers, from architects to the end customers. This is our recipe for making sure that our results always meet our clients' expectations.

Its many years of experience have allowed Oxin's projects to pass the most stringent certification requirements and comply with the guidelines of the most important international control authorities such as the United States Public Health Service (USPHS).

CRAFTMANSHIP IS EXCELLENCE IN DETAIL

From steel cutting and right through the assembly stage, Oxin manages all steel structure work processes in the house. The work is carried out by the highly skilled and fully experienced personnel. Every component is crafted using a tailor-made approach and followed through to the utmost degree of perfection.

CARE, PASSION AND ITALIAN DESIGN

Oxin's products are world renowned for their exceptional quality and attention to the minutest detail. Oxin is located in Veneto, the heart of the Italian stainless steel industry, a region famous for its passion for aesthetics and the goal-driven attitude combined with a knack for ambitious projects.

For Oxin, every assignment is a new sailing, following new exciting routes.
