

Unique Hightech = Phase Cooler Elegant

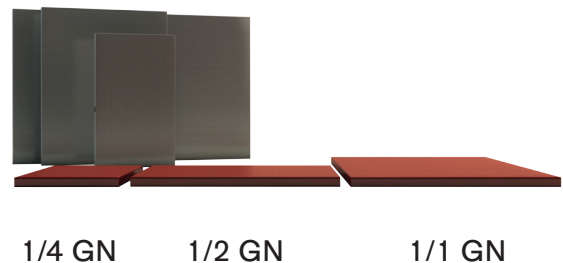

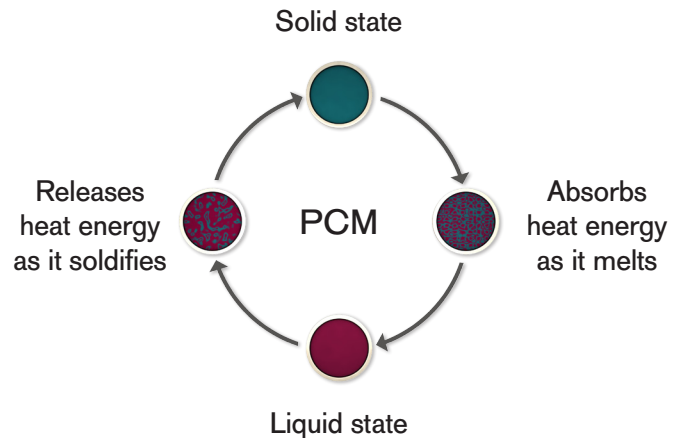

Phase Cooler fulfil all high demands of effective, hygienic and safety way to maintain cooled food chilled for a long time in transportation or display of cooled buffet in restaurants.

Phase cooler contains a unique organic recyclable PCM (phase shifting material) for spreading cool. Phase cooler are easy to clean washable in dishwasher with a high hygienic standard on the produce. (No granule dishwasher)

Phase Coolers:

- Charge in freezer for 1 ~2 hours at -18°C. The charge starts already at below +4°C (40°F).
- When temperature are above +4°C (40°F) the phase shifting begins and cooling process starts.
- Keeps the food cooled for at least 6 hours if a insulation transport bag/box is used.
- Can in optimum conditions stay under +4°C (40°F) for as long as 24 hours if the food are below +4°C (40°F) when its loading and closed insulation transport box is used.

OBS! Max temperature +50°C (302°F).
