

iPinium Grill Fry Bake (GFB) GN 2/3 5 mm

**Fry grid suitable for frying, baking and grilling in the oven
– with great results.**

Item nr.	GFB23
Size	325 x 354 mm
Weight	1340 g

On one side a grilling grid that gives you those wonderful, classic grill stripes and the most juicy meat you can imagine – all thanks to iPinium's unparalleled and patented aluminium alloy. On the other side a baking grid developed especially for those who love to bake a lot and who desire the best possible result every time. That side is also perfectly suitable for frying. Our combination grids are simply a must, in the professional kitchen as well as in the home kitchen.

Our products' optimal capacity for absorbing, retaining and transferring heat as good as halves cooking time, compared to regular oven fry grids. At the same time our grids help preserve fluid in the raw produce. The food, quite simply, tastes better. Dishes also look more appetizing since the iPinium grilling grid gives a wonderful cooking surface with beautiful grill stripes.

There is no need to use any fat while cooking. The produce will not burn on our unique surface. This of course means that you can offer guests a healthier, more nutritious meal.

After eating, when it is time to do the dishes, there is another surprise. All you need to get the fry grid sparkling clean is lukewarm water and a plain scrubbing brush. If you're using a dishwasher, our tests show that you can halve washing time with an iPinium fry grid compared to a regular professional fry grid.

This grid is suitable for about 6-7 chicken fillets, weighing about 135 grams each.

This is what we mean with a whole new way of cooking!
