iPinium Grill Fry Bake (GFB) GN 1/1

Use our grill grid for grilling in the oven and creating a beautiful, appetizing grill pattern on salmon, chicken, entrecôte etc.

Item nr.	14225
Size	325 x 530 mm
Weight	2245 g

Our grill grids combine culinary cooking skills with efficiency and energy savings. The secret lies in iPinium's unparalleled and patented aluminium alloy. The grids' optimal capacity for absorbing, retaining and transmitting heat as good as halve cooking time compared to regular grids. Meanwhile the grid helps preserve the fluid in the raw produce. The food, quite simply, tastes better. Dishes also look more appetizing since the iPinium grids give a beautiful surface with classic grill stripes.

There is no need to use any fat while cooking. The produce will not burn on our unique surface. This of course means that you can offer guests a healthier, more nutritious meal.

After eating, when it is time to do the dishes, there is another surprise. All you need to get the grill grid sparkling clean is lukewarm water and a plain scrubbing brush. If you're using a dishwasher, our tests show that you can halve washing time with an iPinium grill grid compared to a regular professional grill grid.

This grid is also suitable for use with frozen products. Moisture will drip down and you can use a container underneath for collecting this fluid.

This is what we mean with a whole new way of cooking!
